Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 4, 6-15, 19-25, and 28 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. At least recitation of “the first media line”, “the second media line”, “the first switch” in claim 4, “the associated heating element”, “the associated regulation circuit” in claim 6, “the heating current” in claims 8 and 19, “the air media heating”, “the output signal” in claims 6 and 9, “the associated medial line” in claim 10, “the water heating” in claims 11 and 21, “the region” in claims 15 and 25 lack sufficient antecedent basis. In claims 18 and 28, there is no set of electronic components claimed to have a second set.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1, 3-6, 10, 17, 18, 26, and 27 are rejected under 35 U.S.C. 102(b) as being anticipated by West (5,123,839). West discloses a device comprising media line 14, a heating element 12 associated with the media line, a temperature sensor 24, and a regulation circuit 27 which controls the heating element (column 4 line 35). Patentable weight is not given to inferentially claimed element and its intended use, however, West shows a switch and the

Art Unit: 3732

heating element is, after activation of the switch, operable independent of an output signal of the regulation circuit (column 4 line 35). The device comprises a further media line 16. The media lines provide for delivery of air and water. The heating element and circuit are capable the intended use of the device. The sensors are arranged directly in the media line. A dental spray handpiece 100 comprises the heating device.

Allowable Subject Matter

5. Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
6. Claims 7-9, 11-15, 19-25, and 28 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
7. Claims 16, 29, and 30 allowed.

Response to Arguments

8. The examiner is not required to list every instance of indefinite language in the claims, particularly when most are repetitive. The rejection is now directed specifically to claims; however, Applicant is requested to review the claims thoroughly. The prior art shows the claimed structure of the limitations. The claims do not read that the heating unit is operated independent of the temperature control system as argued. It is noted that applicant states that informalities in the specification were deleted by the way of preliminary amendment.

Conclusion

9. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
